## Questions for the Week

1. In Acts 21:1-14, Paul receives several warnings about the suffering he will face. How do these warnings help us understand the difference between God revealing what may happen and God telling us what we must do?
2. Paul was surrounded by people who genuinely cared about him, yet he remained committed to following what he believed God was calling him to do. How should we balance the counsel of godly people with our own responsibility to discern God's will?
3. Why is it dangerous to assume that every difficult circumstance means we are outside God's will? How does Paul's experience in Acts 21 challenge that way of thinking?
4. After prayer, Scripture, godly counsel, and careful consideration, there are times when we still have to make a decision without having every detail figured out. What does Paul's response in Acts 21:10-14 teach us about making faithful decisions and trusting God with the consequences?
